Time of Day and Bypass

Time of Day:

- Press and hold in the red button to disengage the drive gear.
- Turn the large gear until the actual time of day is at the time-of-day arrow.
- Release the red button to re-engage the drive gear. Now the time of day on "clock" has been set.

Pull the red handle in the direction of the blue arrow. The position indicator will then point to BYPASS. This bypass may be in a verticle or horizontal position.
