

Manual Regeneration:

1. Immediate Regeneration - Press the REGEN button and use the UP and DOWN buttons to select immediate or delayed regeneration.

Setting The Clock:

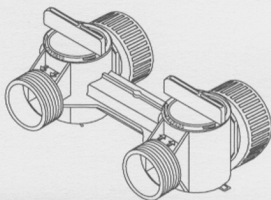

1. Press the SET button. The time will Flash.
2. Use the UP or DOWN arrows to advance to the correct time. Note: There is a PM indicator, but no AM indicator.
3. Press the SET button to accept the time of day selected.
4. The control will advance to the **DAY OF WEEK** setting.

DAY OF WEEK:

1. Press the SET button to make day of the week appear.
2. Use the UP or DOWN arrow buttons to advance to the correct day of the week.
3. Press the SET button again to accept the changes

Bypass:

To bypass the conditioner with the 1265 bypass valve, rotate the handles clockwise so they are both perpendicular to the flow path of the inlet and outlet water stream, as shown below.

To return to the conditioned water or service position, rotate the handles counterclockwise so they are parallel to the flow path of the inlet and outlet water stream, as shown below.
